                     R W Witty

The Use of the DCS macro package

I have just amended the existing macro files on RLVC to
allow the production of Software Engineering Group Note
title pages. The SEG proforma differs only slightly from
the original CBP one, and can be found in
'/usr/lib/tmac/seg.proforma'   or   in
'/usr/lib/titmac/seg.proforma' for anyone to copy. Both
files are in fact identical. The relevant macros are
invoked by using '-mdcs' on the titroff/troff/nroff command
line instead of '-ms'

This note was produced using the new macros.
